

Ritik Sharma

Backend-focused engineer building scalable systems with a strong focus on data consistency, performance, and API design. Experienced in designing REST and GraphQL APIs, implementing authentication, and handling real-world backend concerns like caching, concurrency, and transactional integrity.

PROJECTS

ChatSys — Real-Time Messaging System

[Link](#) | [Github](#)

- Built a real-time messaging backend using Redis pub/sub and PostgreSQL for persistent storage
- Designed message flow to ensure **atomic writes and consistency** across concurrent users
- Implemented secure GraphQL mutations to prevent invalid state transitions
- Modeled conversation and message schemas to support scalable querying and unread tracking

Smendship — Social Backend System (Facebook-like)

[Link](#) | [Github](#)

- Designed a domain-driven backend system with modular architecture using Node.js and Express
- Implemented JWT-based authentication with role-based authorization
- Designed relational database schema ensuring referential integrity and transactional consistency
- Built scalable APIs for user interactions and content workflows

EDUCATION

Chhatrapati Shahu Ji Maharaj University, Kanpur Nagar — Bachelor of Computer Application

July 2024 - July 2027

CGPA: 7.93/10

SKILLS

Core: Node.js, Express.js, PostgreSQL, REST APIs, GraphQL

Backend Concepts:

Authentication (JWT), Caching (Redis), Transactions, Schema Design, API Design

Languages: JavaScript, C++, Python, SQL

Tools: Git, Postman, PgAdmin

CERTIFICATES

FreeCodeCamp [JavaScript Algorithms and Data Structures](#)

FreeCodeCamp [Responsive Web Design](#)

FreeCodeCamp [Front End Development Libraries](#)

HackerRank [JavaScript \(Basic\)](#)

LANGUAGES

English, Hindi
